**Broadcasting DTV** 

# **HP-BB Series - EX9001** High Efficiency UHF Broadband Transmitters ISDB-T TV Digital: 680 to 8.400 Watts RMS

#### **HP-BB Series**

Family E-Compact of high-power UHF broadband digital TV transmitters. Fully solid-state, air-cooled, and featuring a standard 19" rack modular structure. Compact, high-density, and efficient, embedded with adaptive non-linear technology; allowing for imperceptible recovery of MER values in case of changes in equipment output power.

It offers the option of Dual Exciter, providing automatic redundancy to the equipment without the need for separate control module management. Broadband Power Drawer with Doherty topology, high performance, with up to 41% efficiency, featuring three built-in power supplies for warranty and high reliability against failures.

- ISDB-T EX9001 Exciter with System on Chip (SoC) technology.
- Measurement tools through the WEB interface. In a graphical environment, it provides visualization of measurements such as Intermodulation and MER, eliminating the need for expensive measurement equipment.
- Equipment control, including Power Drawers, executed by the Exciter, eliminating the need for external control units.
- Broadband Power Drawers with high-efficiency Doherty topology.
- Real-Time adaptive non-linear and linear pre-correction function.
- Parametrizable embedded BTS decompressor, allowing compatibility with other brands.
- Embedded remux, enabling signal adaptation according to transmission needs.
- Embedded satellite receiver, with optional licenses for Free to Air, IRDETO<sup>2</sup>, CONAX<sup>2</sup>, VERIMATRIX<sup>2</sup>, NAGRAVISION<sup>2</sup>, BISS-1, and BISS-E.
- Automatic control of fan speed, resulting in low noise levels, energy savings, and extended device lifespan.
- High reliability against failures. For the HP-BB line, 3 (three) power supplies for each Power Drawer. Balanced distribution of electrical network in a three-phase system.
- "Easy Maintenance" concept offering, among other features, Plug-In connection for Power Supplies and Power Drawers.
- Isolated RF<sup>3</sup> combiners allowing Hot Swap<sup>4</sup>.
- MCCB (Molded Case Circuit Breaker)<sup>3</sup>, AC distribution module with Surge Protection Device (SPD) – Optional surge protection devices.

### **Available Features**

| System | on | Chip | (SoC) | Technology |
|--------|----|------|-------|------------|

| System on Chip (SoC) Technology  |   |
|--|---|

AVAILABLE   |
| This makes it a compact system with significant processing power and high reliability.   |   |
| Measurement Tool<br>MER, Intermodulation, Power, Temperature, and other measurements via WEB in a graphical environment. Enables the visualiza   | ation AVAILABLE   |
| of constellation and spectral density diagrams, among others, providing a cost-effective alternative for measuring these parameter   |   |
| Remote Software Update   | AVAILABLE   |
| It is possible to update the equipment's software remotely through the WEB interface.  | AVAILADLE   |
| MCCB (Molded Case Circuit Breaker) <sup>3</sup>  |   |
| AC distribution module from 8kW to 30kW composed of circuit breakers, In-Rush current limiting system, phase loss protection and the system of   |   |
| overvoltage protection, undervoltage protection (<180VAC), auxiliary power supplies of +50VDC, +15VDC, and +8VDC, and a sa interlock input for cutting off equipment power supply.   | alety   |
| "Easy Maintenance" Concept   |   |
| Power supplies with plug-in connection, eliminating the need for cables and wiring and allowing for quick and secure replacement   | t. <b>AVAILABLE</b>   |
| Power supplies can be removed via the front panel of the Power Drawer.   |   |
| Embedded WEB Server  |   |
| Remote access to transmitter settings and management is possible via PC or Smartphone through the Ethernet <sup>1</sup> port. It utilizes the  | ne AVAILABLE  |
| PC or Smartphone's own browser, eliminating the need for driver or application installations.  |   |
| Adaptive Linear and Nonlinear Pre-Correction   | on <b>AVAILABLE</b>   |
| Adaptive pre-correction applied due to changes in the transmitter's output power to imperceptibly recover MER and intermodulation values.  | ON AVAILABLE  |
| BTS Decompression  |   |
| Parametrizable BTS decompressor, embedded in the transmitter, eliminates the need for auxiliary equipment in the system and  | AVAILABLE   |
| enables interoperability with other brands.  |   |
| Remux and Embedded Table Generator   |   |
| Table generator embedded in the transmitter, with the ability to filter PIDs, insert static PSI/SI tables, parameterize TMCC, among other functionalities.   | g AVAILABLE   |
| Exciter Inputs/Outputs   |   |
| Inputs: BTS/TS over IP, 2x ASI/310M, 1PPS, 10MHz, and GPS ANTENNA.   |   |
| Outputs: 2x ASI/310M, 1PPS, 10MHz, and Ethernet <sup>1</sup> RJ45.   | AVAILABLE   |
| The BTS/TS over IP input can be converted to ASI and made available in the ASI/310M outputs without interfering with the   |   |
| modulated signal. Passive Elements   |   |
| Mask filter, directional coupler with integrated FWD and REF signal samples, combined with a low-pass filter.  | AVAILABLE   |
| Isolated RF Combiners³ allowing Hot Swap⁴.   | AVAILABLE   |

SAT Tuner (Satellite Reception) Banda L DVB-S/S2 compatible tuner for C and Ku-band LNB. Comes with a coaxial surge protector. CAS Tuner (Conditional Access Satellite Reception) Banda L DVB-S/S2 compatible tuner for C and Ku-band LNB. Decrypts up to 04 simultaneous services and allows viewing of up 08 services on the display. Comes with a coaxial surge protector. Decryption Licenses for CAS Tuner: (BDETO <sup>2</sup> , CONAX <sup>2</sup> , NAGRAVISION <sup>2</sup> , VERIMATRIX <sup>2</sup> , BISS-1, and BISS-E Decryption licenses can be acquired individually or collectively, for new transmitters or for tarasmitters already in operation in the for                        | AVAILABLEith aOPTIONALOPCIONALOPTIONALutsOPTIONALOPTIONALOPTIONALiningOPTIONALiningOPTIONALiningOPTIONALiningOPTIONAL   |
| Three 1200-watt power supplies per Power Drawer. Energy redundancy operation. Plug-in type Power Supplies ("Easy Maintenance" concept), eliminating the need for cables and wiring, and allowing quick and se replacement. Balanced distribution of electrical network in a three-phase system. Digital Manuals in English. Dual Driver Backup exciter, providing automatic redundancy without the need for management by a separate control module. Comes wi standard 19" rack Ethernet' switch. DPS (Surge Protection Devices) Extra protection against overvoltage surges from the electrical network. ASI to IP Converter Bidirectional Ethernet' port for TSoIP streaming (input/output). The BTS/TS signal inserted into ASI or TUNER (SAT or UHF) input can be made available on the Streaming port (TSoIP) without interfering with the currently modulated signal. This functionality is optional and enabled through a software license. TS Analyzer Allows checking TS information such as PIDs, Continuity Package Error, Program Name, Bit Rate, among others. GPS Time Base High-precision time base synchronization via GPS. High performance in SFN (Single Frequency Network) operation. Comes witt external GPS antenna and surge protector. VHF-BII / UHF Tuner (Terrestrial Reception) ISDB-T VHF-BII / UHF Tuner (admition of adjacent channels. SAT Tuner (Satellite Reception) Banda L DVB-S/S2 compatible tuner for C and Ku-band LNB. Comes with a coaxial surge protector. CAS Tuner (Conditional Access Satellite Reception) Banda L DVB-S/S2 compatible tuner for C and Ku-band LNB. Decrypts up to 04 simultaneous services and allows viewing of up  o8 services on the display. Comes with a coaxial surge protector. ## HP-BB Series UHF ISDB-T – EX9001

#### **General Features**

| Exciter model EX9001 with System on Chip (SoC) technology.   |
|--|
| Mounting in a standard 19" Rack cabinet.   |
| Fully solid-state.   |
| 900 Watts RMS Doherty Power Drawers with LDMOS transistors.  |
| Air-cooled.  |
| Automatic restart in case of power outage.   |
| Operates in SFN (Single Frequency Network) and MFN (Multiple Frequency Network).   |
| Control firmware managing the entire equipment.  |
| Access to settings and parameter management via display interface on the Exciter's front panel or remotely via Ethernet <sup>1</sup> (WEB server or SNMP). |
| Alarm indicator LEDs on the Exciter and Power Drawer front panels.   |
| Access to the list of current or past alarms via display interface on the Exciter's front panel or remotely via WEB interface.                             |
| VSWR and Overpower protection via hardware and software, with automatic power reduction.   |
| Software protection against module temperature increase, with alarm signaling and power reduction.   |
| Automatic fan speed control.   |
| Automatic compensation of power transistor bias quiescent current based on temperature.  |
| AGING compensation adjustment for transistors via display on the Exciter's front panel.  |
| Automatic and programmable input switching in hold-on and hold-off modes.  |
| Power supply with Power Factor Correction (PFC) and soft start with In-Rush limitation.  |

RF interconnections between equipment parts using rigid lines.

#### Notes:

<sup>1</sup> Ethernet is a trademark of Xerox Corporation.

<sup>2</sup> Module with PCMCIA CAM slot (Irdeto, Conax, Nagravision, and Verimatrix systems), SMARTCARD, and CAM not included.

<sup>3</sup> Except for the EC701HP-BB model.

<sup>4</sup> Power Drawers can be removed or inserted with the Transmitter in operation, but the Power Drawer to be removed or inserted must have the AC key on its front panel in the OFF position.

<sup>5</sup> Considering optimized channel and environmental conditions. May vary depending on channel frequency and operating conditions.

<sup>6</sup> The transmission mask depends on the type of filter used.

<sup>7</sup> Consult the factory for other types of output connections.

<sup>8</sup> AC Power Supply Upon Request for EC708HP-BB and EC712HP-BB models.

<sup>9</sup> Nominal power up to 2.500m. Above 2.500m, consult the factory.
